

Meeting the Needs of Childhood Victims of Sex Trafficking

Yolanda P. Graham, M.D.

SVP and Chief Medical Officer/Chief Clinical Officer

Devereux Advanced Behavioral Health

NACBH

National Association for Children's Behavioral Health

Emerging Best Practices Conference

December 5-6, 2019

St. Pete Beach, FL

Learning Objectives

At the conclusion of this learning activity, participants should be able to:

- Understand risk factors for the Commercial Sexual Exploitation of Children (CSEC)
- Identify and assess potential CSEC victims
- Inform treatment approaches, program design and outcomes for CSEC programs
- Understand trauma bonding and the stages of change of recovery
- Articulate the importance of multi-agency collaboration, advocacy and prevention

Emerging Best Practices Conference

December 5-6, 2019
St. Pete Beach, FL

NACBH

National Association for Children's Behavioral Health

Definition

Child sex trafficking is the recruitment, harboring, transportation, provision, obtaining, or advertising of a minor child for the purpose of a commercial sex act, which involves the exchange of anything of value – such as money, drugs or a place to stay – for sexual activity (NCMEC).

NACBH

National Association *for* Children's Behavioral Health

Emerging Best Practices Conference

December 5-6, 2019 | St. Pete Beach, FL

CSEC includes:

- Street trade
- Pornography
- Stripping
- Erotic/nude massage
- Escort services
- Phone sex lines
- Private parties
- Gang and organized crime-based prostitution
- Familial pimping
- Forms of internet-based exploitation

NACBH

National Association for Children's Behavioral Health

Emerging Best Practices Conference

December 5-6, 2019 | St. Pete Beach, FL

Scope of the Problem in the U.S.

- At least **100,000** to **300,000** youth are at risk for commercial sexual exploitation annually in the U.S. (Estes and Wiener, 2001; SHI 2010)
- In 2018, the National Human Trafficking Resource Center hotline, operated by Polaris, received reports of 7,859 sex trafficking cases inside the United States; 5,173 were minors
- 1 out of 5 girls and 1 out of 10 boys will be sexually exploited by the time they reach adulthood (SHI)
- Up to 50% of commercially sexually exploited children in the U.S. and Mexico are boys (Estes & Weiner, 2002; EPCAT, 2013)
- The most common age of entry into the commercial sex industry in the U.S. is **15** years old (SHI)

NACBH

National Association for Children's Behavioral Health

Emerging Best Practices Conference

December 5-6, 2019 | St. Pete Beach, FL

Demand

- Sex trafficking is demand-driven and the product for sale is most commonly local (domestic) children (SHI)
- Sex trafficking is a lucrative industry, making an estimated \$9.9 billion a year (Equality Now)
- Traffickers can sell children for \$400/hr or more, an average of 10-15 times a day, 6 days a week

NACBH

National Association for Children's Behavioral Health

Emerging Best Practices Conference

December 5-6, 2019 | St. Pete Beach, FL

Risk Factors

- **Runaway**

- 1.6 million children run away from home each year in the U.S. (The National Incidence Studies of Missing, Abducted, Runaway, and Thrownaway children)
- In 2018, an estimated 1 out of 7 endangered runaways reported to the National Center for Missing and Exploited Children were likely victims of sex trafficking
- **41%** were approached by an exploiter **within 24 hours** of becoming homeless

- **Abuse**

- 95% had a history of child maltreatment (49% sex abuse; 33% physical abuse); UPenn 2018

- **Social Services Involvement**

- 63% reported involvement with social services or foster care and 86% were in the care of social services when they ran

- **LGBTQ Identity**

- 40% of LGBTQ youth and 60% of trans youth reported sex trafficking

NACBH

National Association for Children's Behavioral Health

Emerging Best Practices Conference

December 5-6, 2019 | St. Pete Beach, FL

Pathways to Entry

- Peer recruitment (bottom girl/victim offender)
- Seduction and coercion (“boyfriend”)
- Internet enticement through chat rooms or profile-sharing sites
- False advertising for modeling, acting or dancing opportunities
- Violence and force (guerilla pimp/gang involvement/kidnapping)
- Parents selling children

Emerging Best Practices Conference

December 5-6, 2019 | St. Pete Beach, FL

Trauma Bonding (Stockholm Syndrome)

- The presence of a perceived threat to one's physical or psychological survival and the belief that the abuser would carry out the threat
- The presence of a perceived small kindness from the abuser to the victim
- Isolation from perspectives other than those of the abuser
- The perceived inability to escape the situation

Complex Trauma Bonds in CSEC

- Used to describe CSEC victims by Farley et al. in 2000
- Emotional bonding to the victim's pimp occurs during periods of captivity; they stop viewing themselves as captives and begin to see their pimp as their boyfriend
- Identification with the pimp's perspective creates an emotional bond where the victim may feel guilty if they attempt to escape
- Victims feel that they "owe" their pimp and cannot be disloyal by leaving; believe if they even think a disloyal thought, exploiter will know and retaliate

NACBH

National Association for Children's Behavioral Health

Emerging Best Practices Conference

December 5-6, 2019 | St. Pete Beach, FL

Complex Trauma Bonds in CSEC

- Victims cannot see themselves returning home or to the “system” where they were desperate to escape the rules, structure, or abuse
- Victims fear for their safety if they attempt to escape
- Victims fear for the safety of their family members if they escape
- Victims are brainwashed to believe that their families will disown them if they return; that they are worthless now

NACBH

National Association for Children's Behavioral Health

Emerging Best Practices Conference

December 5-6, 2019 | St. Pete Beach, FL

Complex Trauma Bonds in CSEC

- Hyper vigilant to exploiter's needs
- Sees world from exploiter's perspective
- Seeks to keep exploiter happy to decrease violence
- Sees outside authorities/people trying to win release (escape) as bad guys
- Sees pimp as good guy, protector, victim
- Is thankful and grateful that the pimp/trafficker/customer has not killed them

NACBH

National Association for Children's Behavioral Health

Emerging Best Practices Conference

December 5-6, 2019 | St. Pete Beach, FL

Assessment

- Look for warning signs: history of abuse, runaway/homelessness, secrecy about living situation, truancy, dates older people, controlling relationships, unexplained tattoos or branding, possession of large sums of money or hotel key cards, lies about identity, lifestyle related language, substance abuse
- Screen all youth in mental health and healthcare settings, social services, and juvenile justice settings using a standardized tool (this includes boys)
- Screening Tools:
 - CANS-CSE
 - CSE-IT (WestCoast Children's Clinic) <http://www.westcoastcc.org/wp-content/uploads/2017/09/WCC-CSE-IT-ImplementationGuide-FINAL.pdf>
 - Child Sexual Exploitation Screening Tool (UK) <https://www.solihull.gov.uk/Portals/0/SocialServicesAndHealth/CSEScreeningtoolkit.pdf>
 - Quick Youth Indicators for Trafficking (QYIT) <https://www.covenanthouse.org/charity-blog/blog/new-help-human-trafficking-victims>
 - Statewide tools

Assessment of Runaway Risk

Predicting running away in girls who are victims of commercial sexual exploitation, [Child Abuse Negl. 2018 May; 79: 269–278.](#)

- Youth Level of Service/Case Management Inventory
 - clinician-rated instrument often used in the juvenile justice system to evaluate risk and needs of adolescents aged 12–18
 - valid means of predicting recidivism
- Girls in CSEC group were more likely to have experienced sexual abuse, an STI, post-traumatic stress disorder diagnosis, and a substance use disorder diagnosis than high-risk girls
- YLS/CMI scores significantly predicted future running away among the CSEC group but not the high-risk group
- May help determine level of care needed

NACBH

National Association for Children's Behavioral Health

Emerging Best Practices Conference

December 5-6, 2019 | St. Pete Beach, FL

Treatment Best Practices

- Provide care in the least restrictive environment, except when to do so increases risk
- Continuum of services: case management, drop-in, specialized foster care, community group homes, residential
- Engagement: Develop trust/show respect, address immediate needs
- Peer- or survivor-led resources
- Develop competency in language, lifestyle/culture, LGBTQ competency
- Multi-agency collaboration
- Motivational Interviewing

NACBH

National Association for Children's Behavioral Health

Emerging Best Practices Conference

December 5-6, 2019 | St. Pete Beach, FL

Treatment Best Practices

- Mandatory reportable form of child abuse, be clear on limits of confidentiality
- Screening for mental health symptoms at multiple points in time
- Use of evidence- or research-based CSEC-specific curriculum (e.g., STRIVE)
- Use of other evidence- or research-based curricula based on presenting symptoms (e.g., Trauma-focused/Cognitive Behavioral Therapy or Dialectical Behavior Therapy)
- Individual, family, and group therapy; ***Group therapy is an important component**
- Substance abuse treatment
- Medical services
- Use of medications may be necessary (e.g., anxiety or depression)
- Adjunct therapies (music, art, yoga, experiential)

NACBH

National Association for Children's Behavioral Health

Emerging Best Practices Conference

December 5-6, 2019 | St. Pete Beach, FL

Treatment Phases

Assessment Phase (30 Days)

- Assessments: CANS, CSE-IT, SASSI, Trauma assessment (TSCC, CPSS, UCLA, THQ), ACES, URICA
- Psychiatric assessment
- Medical screening
- Biopsychosocial assessment, social determinants of health
- Family assessment
- Life story/Sexual history
- Corroborative information

Treatment Phase (8 Months)

- Individual, Family, and Group Therapy
- Experiential Therapies: Adventure based, animal-assisted therapy, art, yoga
- STRIVE curriculum, TF-CBT, DBT
- Substance abuse treatment
- Life skills training
- Relapse prevention plan

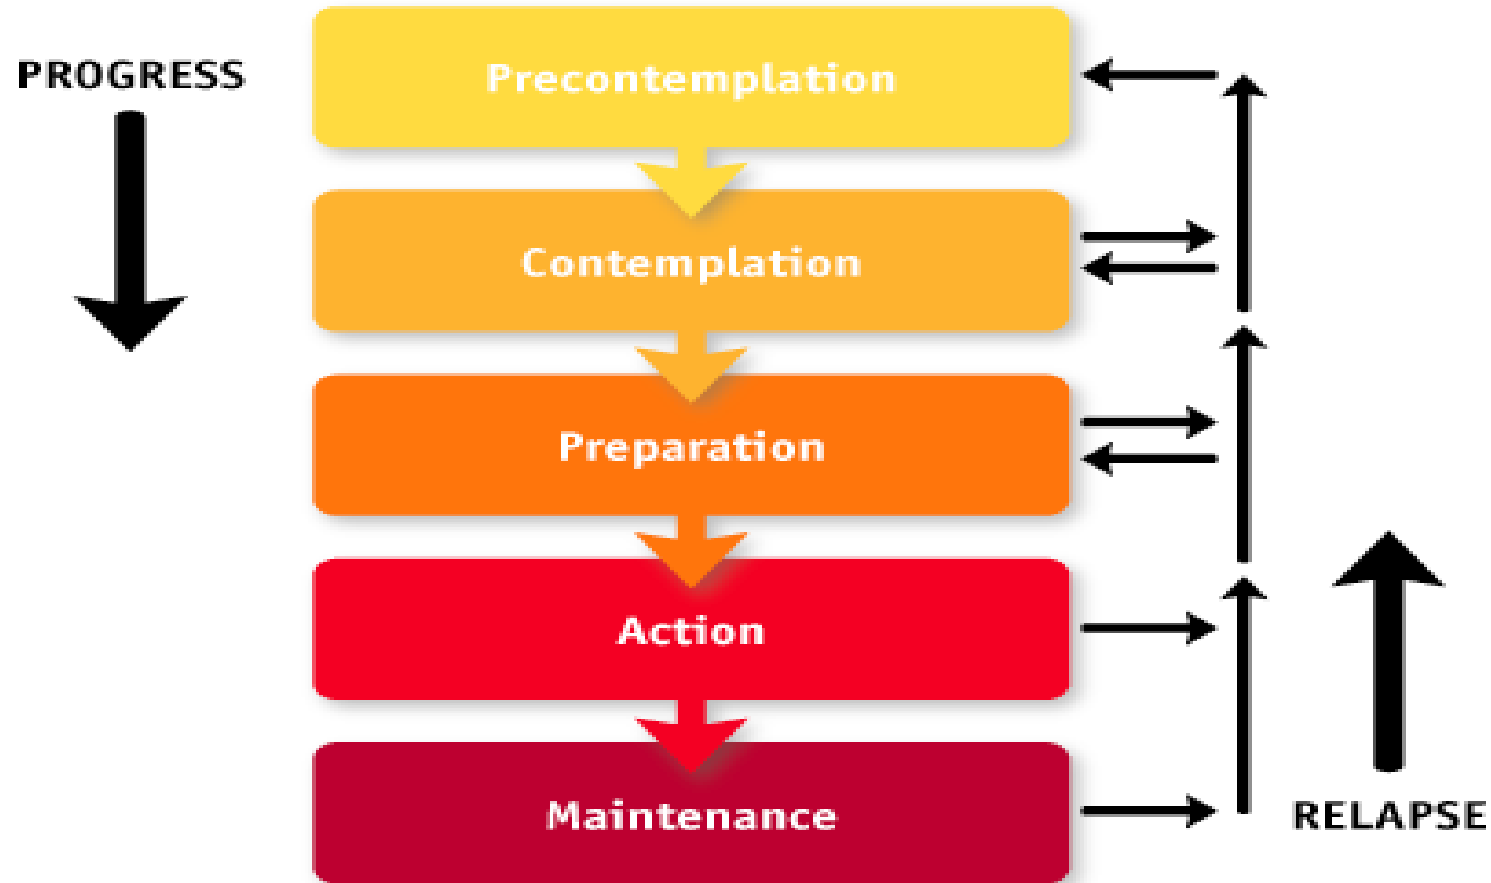

NACBH

National Association for Children's Behavioral Health

Emerging Best Practices Conference

December 5-6, 2019 | St. Pete Beach, FL

Stages of Change Model

NACBHV

National Association for Children's Behavioral Health

Emerging Best Practices Conference

December 5-6, 2019 | St. Pete Beach, FL

Outcome Measures

- Child and Adolescent Needs Assessment (CANS)
- Child Behavior Checklist (CBCL)
- Trauma Assessment:
 - The Child PTSD Symptom Scale (CPSS)
 - Trauma History Questionnaire (THQ)
 - Trauma Symptom Checklist (TSCC)
 - UCLA PTSD Index
- University of Rhode Island Change Assessment (URICA)
- Post-Discharge Surveys (3, 6, and 12 months)

Managing in Congregate Care Settings

- Monitor and closely supervise all computer use including internet searches
- Monitor firewalls for accessing social media sites
- Do not allow individuals to print anything from the internet that is sexually suggestive or explicit
- Do not let individuals have access to your cell phone
- Adhere to rules regarding dress code
- Avoid doing favors
- Be aware of individuals who go out of their way to make your job easier
- Monitor for grooming behaviors, victim-offenders

NACBH

National Association for Children's Behavioral Health

Emerging Best Practices Conference

December 5-6, 2019 | St. Pete Beach, FL

Delta Program (FL) Outcomes

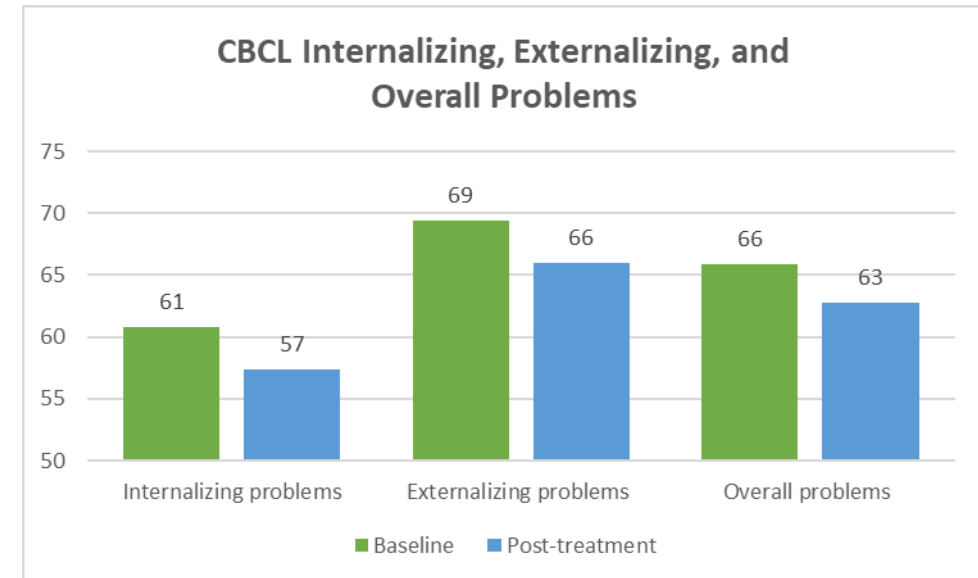

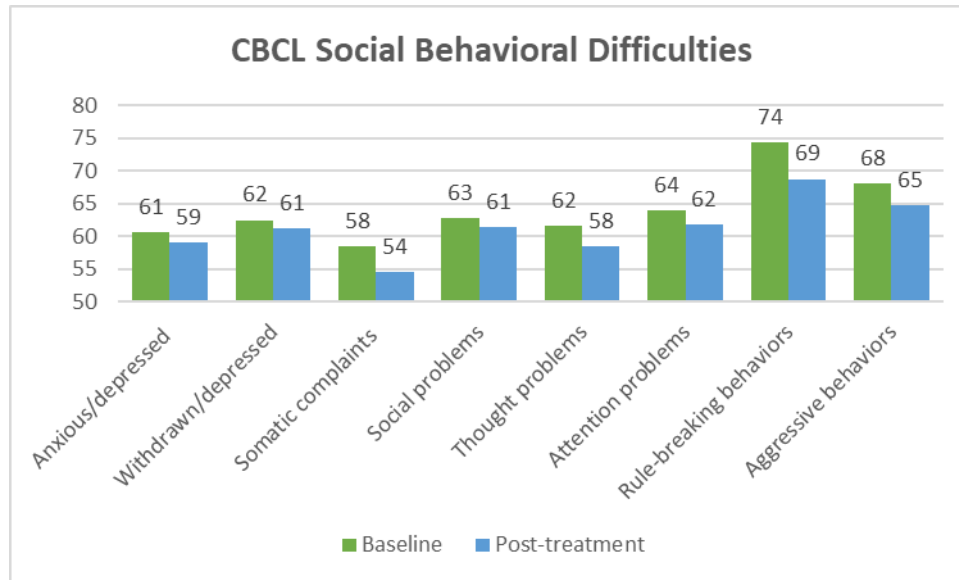

- **Admission Criteria:** Ages 6-18 years, history of sexual exploitation, FSIQ 60 or above, ability to benefit from cognitive behavioral treatment, reports of significant exposure to trauma
- **Unlocked, residential program**
- **95 individuals served between 2013 and 2018, mean age 15 years**
- **53% black, 23% white, 16% Hispanic, and 8% multi-racial or other**
- **Diagnoses: Depression 28%, PTSD 28%, Bipolar 21%, other 23%**
- **Mean length of stay 249 days (8 months)**

CBCL Outcomes

There was a decreasing trend in all domains of social/behavioral difficulties among participants. Changes in somatic complaints, thought problems, and rule-breaking behaviors were statistically significant.

There was a decreasing trend in all internalizing problems, externalizing problems, and overall problems among participants. In particular, changes in internalizing problems and overall problems were statistically significant.

CBCL Outcomes

All youth experienced improvement, but youth with mood disorder showed statistically significant improvement between baseline and post-treatment.

All youth experienced improvement in thought problems, but youth with PTSD showed statistically significant improvement.

TSCC Outcomes

There was a decreasing trend in all domains, but changes in anxiety, depression, and sexual concerns were statistically significant.

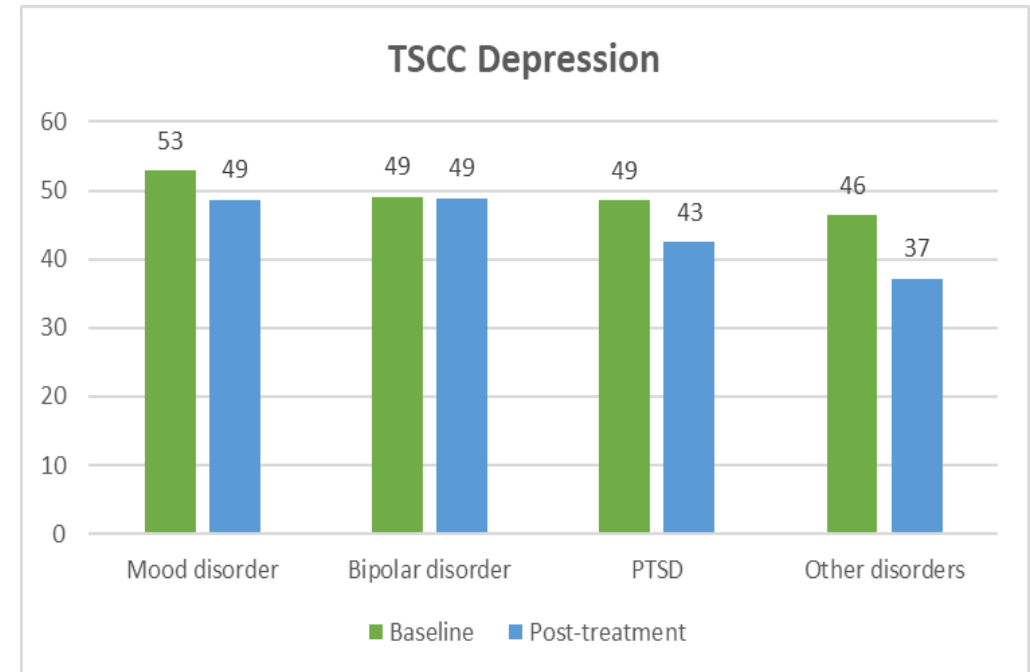

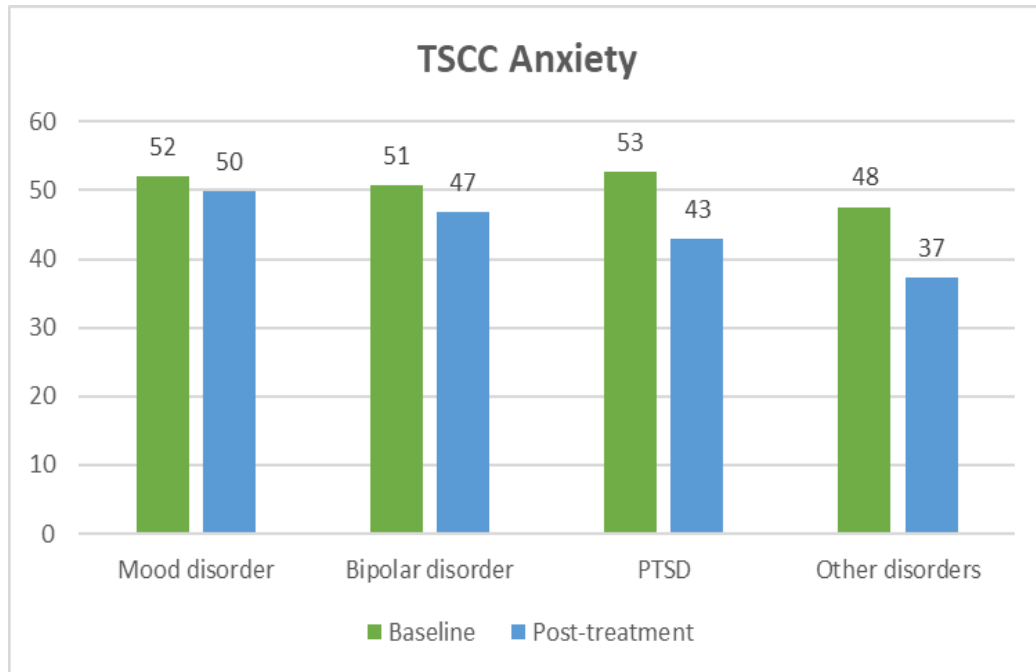

There was a decreasing trend in dissociation and sexual concerns among participants, but changes in sexual distress was statistically significant.

TSCC Outcomes

All youth showed improvement, but youth with PTSD showed a statistically significant improvement.

All youth showed improvement, but youth with mood disorder and PTSD showed statistically significant improvement.

TSCC Outcomes

Youth with PTSD showed a statistically significant improvement in posttraumatic stress.

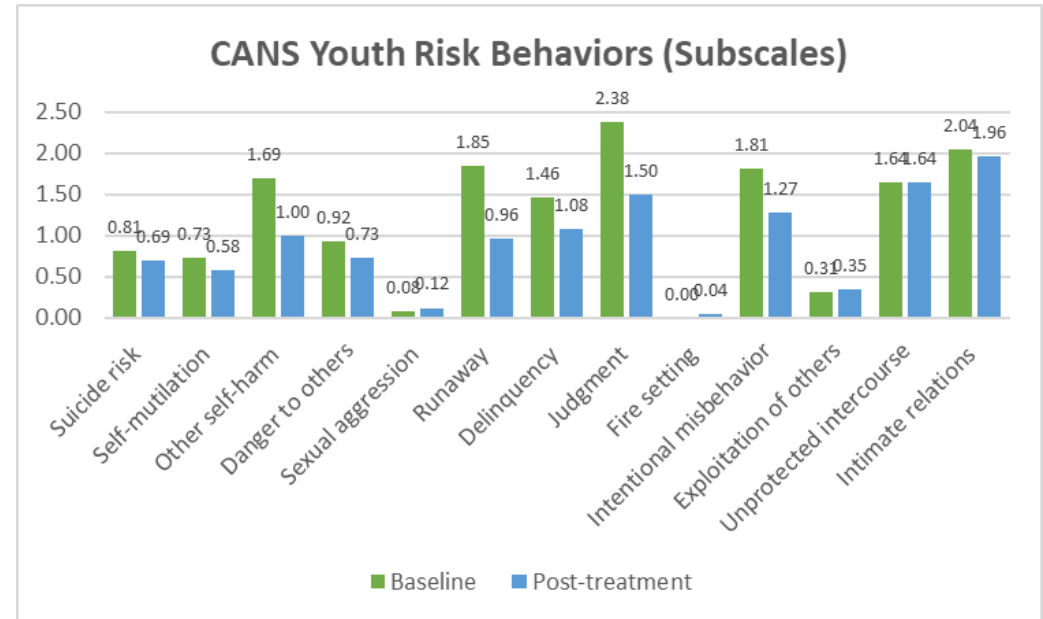

CANS Outcomes

Participants showed a statistically significant decrease in life domain functioning overall, and in the subgroup areas of social functioning and recreational.

Participants showed a statistically significant decrease in youth risk behaviors domain score overall, and in the subgroup areas of runaway, judgment, and intentional misbehavior.

Prevention

- **A21: Bodies are not Commodities** - A high school curriculum to educate and prevent human trafficking
- **Chicago Alliance Against Sexual Exploitation (CAASE)**: Chicago-based program to educate boys about the harms of prostitution and enlist them as allies for women
- **Global Centurion**: VA-based educational program for boys grades 6-12 to reduce demand
- **Chosen**: Documentary series of true stories developed by SHI to educate grades 6-12
- **Deceptions**: Washington-based program exposing the dangers of sex trafficking and internet dangers for grades 6-12
- **Youth for Sale**: NYC-based Frederick Douglass Family Initiatives - use of victim stories to educate youth on risk factors for being trafficked
- **Tell Your Friends**: Interactive teaching curriculum developed by Washington, D.C.-based Fair Girls
- **Not a Number**: Interactive 5 lesson prevention curriculum
- **My Life, My Choice**
